Location: Berlin, Germany

Software & Machine Learning Engineer with 5+ years of experience developing production-ready AI systems with expertise spanning LLMs, classical NLP, and computer vision. Bridging cutting-edge research and pragmatic engineering to deliver scalable, high-impact AI solutions.

EXPERIENCE

Senior AI Engineer | *jinit[AG* **Mar 2026 - Present**

Designing and deploying AI-powered solutions for public sector clients. Architect end-to-end pipelines for document intelligence, process automation, and decision-support tools used by federal and municipal agencies. Collaborate closely with stakeholders to translate complex regulatory requirements into scalable, compliant AI components.

Tools: *Python, FastAPI, LangChain, OpenAI / Anthropic APIs, HuggingFace Transformers, Docker, Kubernetes, Terraform, GitHub Actions, Azure / AWS GovCloud, PostgreSQL, MLflow*

Software Developer | *dSPACE GmbH* **Oct 2024 - Present**

Building conversational AI systems for internal and customer-facing applications. Driving company-wide AI adoption through use-case identification. Architecting scalable AI platform for product portfolio integration.

Tools: *[Python, Typescript, Langchain, Azure and AWS Services, FastAPI, Vite, REST, Docker, uv]*

AI Research Engineer | *neurocat GmbH (Nov 2019 - Oct 2023 for 20h/week)* **Jan 2019 - Sep 2024**

Developed features for SaaS platform enabling automated AI system testing. Built end-to-end ML training and evaluation pipelines. Provided ML research expertise across state-funded and commercial projects.

Tools: *[Python, PyTorch, Tensorflow, NumPy, OpenCV, Docker, AWS Services, GitLab, Weights&Biases]*

Data Scientist | *HERR DER LAGE Consulting GmbH* **Jan 2017 - Mar 2019**

Contributed to data consulting projects for hospital operators. Researched NLP-based analysis of clinical documentation. Developed data warehouse for unstructured medical patient data (numerical and text).

Tools: *[Python, SpaCy, SQL, NLTK]*

ACADEMICS

M.Sc. Cognitive Systems | *University of Potsdam, Germany* | Grade: 1.6 **2017 - 2023**

Thesis: [Medical Concept Normalization in a Low-Resource Setting](#).

Projects: Drowsiness Detection from Eye-Tracking, Coreference Resolution, Sentence Simplification with Character-level Transformers, Embedding-based Stance Analysis.

Semester Abroad | *University of Tartu, Estonia* **2015 - 2016**

Joined the Computational Science Department for lectures on Convolutional Neural Network and Combinatorics

B.Sc. Cognitive Science | *University of Osnabrück, Germany* | Grade: 1.7 **2013 - 2017**

Thesis: Using machine learning to predict laboratory test outcomes from available patient data.

Focus: Artificial Intelligence, Computational Linguistics, Computer Science.

SKILLS, TOOLS & LANGUAGES

Programming	Python (production), JavaScript (familiar), TypeScript (familiar)
Machine Learning	PyTorch, TensorFlow, Keras, HuggingFace (Transformers/Datasets), Langchain/Langgraph, RAG, Pandas, NumPy, scikit-learn, SpaCy, OpenCV, NLTK, Weights&Biases, Comet ML, Jupyter, Matplotlib
Full Stack	FastAPI, React, Vite, REST, Postgres, SQL, HTML, CSS
DevOps	Docker, Docker Compose, Kubernetes, CI/CD, Git, Linux, Azure, AWS
Languages	German (native), English (C1), Spanish (A2)
